

Amelie Tobien

Amelie Tobien transfers heart felt emotions with her folk chansons. Sharing experiences and stories through her music, Amelie invites her listeners to get lost in the sound of her steel string guitar and wine drenched voice.

She feels most at home in the singer-songwriter world, but those melodies will get stuck in your head like a fine pop tune. To Amelie, the most honest way of performing is in the streets, getting in touch with her audience by being in the very center of their everyday lives. But also the stage makes her heart beat faster when the crowd sways to the sound of her songs and starts to sing along. "In your Rivers I drown," she sings and so do we as we dive into Amelie Tobien's world. Tobien is currently working on her debut album. Her first single *Rivers* is to be expected this autumn.
